

JOB APPLICATION EMAIL

FROM	Jhon Steven Alvarez Ruiz
TO	Hiring Manager
SUBJECT	Application for the Junior Software Developer Position

Dear Hiring Manager,

I hope you are doing well.

My name is Jhon Steven Alvarez Ruiz, and I am writing to apply for the Junior Software Developer position. I am currently studying Software Analysis and Development at SENA. My professional goal is to help create useful, clear, and reliable digital solutions.

During my training, I have developed basic skills in requirements analysis, programming logic, database management, software testing, technical documentation, and version control with Git. In academic projects, I have organized information, divided problems into smaller tasks, documented decisions, and reviewed results carefully. These experiences have improved my logical thinking and my ability to work with others.

I consider myself responsible, curious, organized, and committed to continuous learning. In my opinion, good software should meet real needs and be easy for people to use. I can bring attention to detail, respectful communication, adaptability, and a positive attitude to your team. I am ready to follow established standards, receive feedback, and help the team achieve its goals.

I am interested in this opportunity because I want to begin my professional career and continue developing my technical and interpersonal skills. If I join your team, I will work carefully, ask clear questions, and contribute to building dependable solutions.

I would appreciate the opportunity to discuss my qualifications in an interview. You may contact me by replying to this message. I can provide any additional information required for the selection process.

Thank you for your time and consideration. I look forward to hearing from you.

Sincerely,

Jhon Steven Alvarez Ruiz
